

## **The following issues have been fixed in the update on 21 June 2011**

### **SSO**

Users using the SSO server/client (not eLogin) did not land on their landing page when logging in. This has now been addressed.

### **URL in portfolio is not working**

Some of our users experienced the message: 'You don't have the permission to view this portfolio' when trying to open a portfolio. This has now been addressed.

### **Early learner interface and password change**

"Must change password on next login" didn't work for early learners. This has now been addressed.

### **Live@edu logout call**

Users that don't have live@edu will no longer experience the live logout call.

### **Add users to policy**

When adding individual users to a policy it took several minutes to build the hierarchy list. This has now been addressed.

In addition we have addressed many other minor issues.
